

ABSTRACT

An object of the present invention is to provide a small-sized light-stabilized soft capsule formulation,  
5 which has a shell that ensures effective light shielding of an active ingredient encapsulated thereby.

The present invention provides a light-stabilized soft capsule formulation comprising a shell containing a non-water-soluble light-shielding agent and having an  
10 average thickness of 200  $\mu\text{m}$  or less, and a medicament encapsulated by the shell.
